User story 1
Front :
As a Job Seeker,
I need to search for jobs by keywords,
So that I can find positions relevant to my skills and interests.

Back :
Detailed Description:
Users should be able to enter specific keywords related to job titles, industries, skills, or other relevant terms. The search results should display a list of job postings that match the entered keywords.

Acceptance Criteria:
- The search bar should be prominently displayed on the job search page.
- Users can enter one or more keywords in the search bar.
- Search results are updated dynamically as keywords are entered.

User story 2
Front :
As a Job Seeker,
I need to receive email notifications for new job postings that match my preferences,
So that I can stay updated on relevant opportunities.

Back :
Detailed Description:
Users should have the option to subscribe to email notifications for newly posted job opportunities that align with their specified preferences. Notifications should include a summary of the job posting and a link to view more details.

Acceptance Criteria:
- Users can toggle email notifications on or off in their account settings.

User story 3
Front :
As a Job Seeker,
I need to save job postings to a "Favorites" list,
So that I can easily access and review them later.

Back :
Detailed Description:
Users should be able to save job postings to a "Favorites" list that is accessible from their profile. This feature will allow users to keep track of positions they are interested in.

Acceptance Criteria:
- Users can add or remove job postings from their "Favorites" list.
- The "Favorites" list is easy to find and navigate in the user's profile.

User story 4
Front :
As a Job Seeker,
I need to upload my resume to my profile,
So that potential employers can review my qualifications.

Back :
Detailed Description:
Users should have the ability to upload their resume and other relevant documents to their profile. The uploaded files should be accessible to potential employers viewing the user's profile.

User story 5

Front :

As a User,

I need to login using my Google account.

So that I can easily access the platform.

Back :

Detailed Description:

Users should be able to login to their profile using their google account credentials.

Acceptance Criteria:

- There should be a forgot password functionality.

User story 6

Front :

Acceptance Criteria:
- There should be an edit option.
- The edit functionality should be easily accessible.

User story 8
Front :
As a Company Administrator,
I need to publish my job profile.
So that the job seekers can apply for the job.

Back :
Detailed Description:
The company should be able to publish their job posting in order to let the job seekers know about the job profile, job location, salary offered and the qualifications required.

Acceptance Criteria:
- The job posting should be easily visible to the potential job seekers.

User story 9

Front :

As a User,

I need to be able to share my feedback about the platform.

So that other users can be benefitted..

Back :

Detailed Description:

There should be a feedback functionality so that the users can share their experience about the platform.

Acceptance Criteria:

- The feedback option should be easily accessible.
- It should take consent from the user whether to reveal his identity.

User story 10

Front :

As a Company Administrator,

I need to mark job postings as "Filled" or "Closed" when a position is no longer available,

So that job seekers are aware of the status.

Back :

Acceptance Criteria:

- Administrators can update a posting's status to "Filled" or "Closed."
- Status change is reflected on the posting.
- Users attempting to apply to closed positions receive a notification.

User story 11

Front:

As a Company Administrator,

I need to track the number of views and applications for each job posting,

So that I can assess the popularity and effectiveness of our listings.

Back:

Acceptance Criteria:

- Administrator dashboard shows job posting analytics.
- Analytics include view counts and application counts per posting.
